Professional Summary

Computer Science final-year student with professional internship experience in Oracle APEX web development at Pak-Qatar Family Takaful Limited. Skilled in Python, C++, Flask, React, and mobile development with Flutter. Built TasteTalk, an AI-powered Urdu voice ordering system achieving 90% accuracy, as a Final Year Project. Seeking opportunities to apply full-stack and AI development skills in a professional software engineering role.

Education

National University of Computer and Emerging Sciences (FAST-NUCES) Aug 2022 – Jul 2026

Bachelor of Science in Computer Science

Peshawar, Pakistan

- Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Operating Systems, Programming Fundamentals, Artificial Intelligence

Work Experience

IT Intern — Web Development

2025

Pak-Qatar Family Takaful Limited

Karachi, Pakistan

- Developed and maintained web-based internal tools using **Oracle APEX**, contributing to the IT department's digital workflow automation.
- Built and customized interactive web pages and forms within Oracle APEX to streamline data entry and reporting for business operations.
- Collaborated with senior IT staff to gather requirements, implement UI changes, and ensure smooth deployment of web modules.
- Gained hands-on experience with enterprise-level database-driven web development in a financial services environment.

Projects

TasteTalk: Smart Voice Bot for Food Order Handling — FYP

Flask, Python, Flutter, Firebase

- Developed an end-to-end AI voice agent using **Flask** backend to process natural **Urdu voice commands** for food ordering, achieving 90% speech recognition accuracy.
- Integrated **Google Speech Recognition** and **Flutter TTS** to enable real-time, bidirectional voice interaction with an average response time of 1.5–2 seconds.
- Implemented complex cart management logic and dynamic menu fetching to handle multi-item orders reliably in conversational flow.
- Leveraged **Firebase** for real-time order data storage and built a seamless administrative dashboard for order monitoring and management.

Bank Management System

Python, OOP

- Developed a fully functional console-based banking application implementing core OOP principles (encapsulation, inheritance, polymorphism) to manage accounts, transactions, and balance checks.

Handwritten Digit Classifier — Neural Network

Python, NumPy

- Built a multi-layer neural network from scratch without deep learning frameworks; trained and evaluated on the MNIST dataset to classify digits 0–9.

Technical Skills

Programming Languages: Python, C++, C, Dart, JavaScript, PHP

Web Technologies: HTML, CSS, JavaScript, PHP, React

Frameworks & Libraries: Flask, Flutter, React, NumPy, Pandas

Databases: MySQL, Firebase Realtime Database

Enterprise Tools: Oracle APEX

AI & APIs: Google Speech Recognition, Text-to-Speech (TTS), Neural Networks

Core Concepts: Object-Oriented Programming, Data Structures, RESTful APIs, Data Analysis

Tools & Platforms: Git, Linux/Operating Systems, VS Code
